a complete transparency bridge from system requirements to building a multi-user fully functional web service or application (of any form or size ex Facebookcom) trough multi level requirement configuration, and with minimal or no coding efforts Fast, reliable and productive solutions to create new services or enhance existing services

Testing Love Learning to

extreme programming (XP) and the Gamma/Beck xUnit test-ing framework has brought unit testing into the daily conver-sation of many coders (see this article's StickyNotes for refer-ences) But still, many (perhaps the majority of) programmers avoid writing them This article is an attempt to change those developers' minds

Massachusetts Institute of Technology Department of ...

It is the inspiration for the programming language I will design for building intelligent systems In the Society of Mind (SOM) model, a mind is seen as a large society of interacting "agents", extreme form, "embodied intelligence" [18], this doctrine holds that this must be literal physical an ant ...

Thinking in Java - Sharif

Programming is about managing complexity: the complexity of the problem you want to solve, laid upon the complexity of the machine in which it is solved Because of this complexity, most of our programming projects fail And yet, of all the programming languages of which I am aware, none of them have gone all-out and decided that
